

Data Cleaning Process

1. Imported Global Superstore dataset into Excel.
2. Opened Power Query Editor.
3. Removed duplicate records.
4. Checked for null values.
5. Corrected data types:
 - Date columns → Date
 - Sales → Decimal Number
 - Profit → Decimal Number
6. Standardized column names.
7. Created Shipping Days column:

Shipping Days =
Ship Date - Order Date
8. Validated sales and profit values.
9. Loaded cleaned data back into Excel.
10. Exported cleaned dataset for SQL analysis.
